-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Receipt is acknowledged of the amendment and of the request for continued examination filed 06/09/2005.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2-9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bernstein et al.

Bernstein et al disclose a method of treating painful disorders comprising administration of civamide in a vehicle appropriate for the skin or mucosal membranes, including nasal mucosa. In particular, the reference teaches that 0.001 – 1.0% civamide is delivered (see column 2, lines 1-49). The composition itself is administered over a period of two to four weeks before administration is discontinued. The treatment of neuropathies and arthritis are disclosed at col. 3, lines 5-11. Therefore, applicant administers the same bioactive (civamide), in the same vehicles, for the same art recognized purpose, and for the same duration of time. The "long-lasting effect" or duration of pain relief is an inherent property of applicant's use of the same treatment protocol disclosed by Bernstein et al.

Applicant further argues that the reference does not teach an administration step which is resumed for a relatively short period of time after a relatively long period where treatment has stopped. Applicant is essentially claiming an interval treatment regimen over that of the standard one taught by Bernstein et al. However, Bernstein et al is clear in its teaching of the use of civamide in the art recognized treatment of the same condition. Those of ordinary skill would have found it well within their ability to modify the claimed treatment regimen in any number of ways including the interval type regimen set out in the instant claims. The result of that treatment does not appear to be different in any quantifiable manner from that of Bernstein in that the same result is achieved. Therefore, barring the submission of a comparative showing which shows unusual and/or unexpected results from changing the treatment timing of this art recognized method of treatment, it is deemed that the instant method of treatment would have been obvious given the disclosure of Bernstein et al.
